

## JOB DESCRIPTION

<b>Job Title:</b>	BIM Coordinator
<b>Location:</b>	London
<b>Reporting to:</b>	BIM Manager/Project Leader
<b>Working with:</b>	Various

We are looking for someone to join one of our architectural project teams. The purpose of the role will be to assist in the delivery of BIM on project, ensuring that both as a practice we are providing the outputs (geometric and data) required by the BEP and also interacting with consultants data to increase digital coordination. This role will also involve practice development, assisting knowledge transfer to new and existing staff and developing / managing practice recourses which support our projects.

A successful candidate will be embedded within a project team (assisting with architectural packages where relevant) and be supported by the practice's digital design group (including application specialists, content creators and computational specialists).

To be considered you must have lived in the UK continuously for the **past 3 years** (there is a vetting process that the candidate will need to go through).

To be considered they must have;

- Understanding of the architectural process and technical requirements
- Excellent knowledge of BIM, technology, software and processes
- Experience in a similar role, including leading digital coordination workshops on a project £50m+
- Experience in delivering training (software & process)

In return we offer a competitive salary (up to £50k depending on experience) with a variety of excellent benefits, as well as a pleasant working environment.
